

Horses strengthen bodies, minds, and spirits.

Experience it at Therapeutic Equestrian Center!

TEC's therapeutic horseback riding programs can be life-changing for children, teens, and adults who live with disabilities. Whether they are riding, caring for the horses, or doing equine-related activities, TEC programs help them gain strengths and skills they can take beyond the barn.

TEC horses change lives. Let them change yours.

Our year-round riding and equestrian activities:

- Are open to all ages, from pre-schoolers to adults.
- Offer one-on-one, semi-private, and group lessons; tuition assistance is available.
- Strengthen physical, emotional, cognitive, behavioral, and educational skills.
- Create a unique trusting bond with the horses.
- Develop positive social and communication skills.
